TRACEABLE AND VERIFIABLE, FROM PRODUCTION PLANT TO THE STORE SHELF. DJURA MAKES TRACK & TRACE ACCESSIBLE TO ALL

When your company is required to adhere to rules and regulations regarding your products' authenticity and traceability, DJURA's track & trace technology is here to support you. Our three-step process of serialisation, aggregation and anti-tampering offers a solid solution for every production chain that values quality assurance.

POWERED BY BOIKON

Every product is provided with a unique encrypted code, enabling you to keep track at any given point in the logistical process, from the factory to the shelf. Whether it's an individual item or a full pallet, a sturdy box or a flexible package, DJURA keeps an eye out for you.

**DJURA is easily and
seamlessly integrated
into pre-existing
production lines.**

PAPER, CARDBOARD, PLASTIC, TRANSPARENT FOIL - DJURA WORKS WITH EVERY TYPE OF PACKAGING

**"With DJURA
as the key hub for
serialisation and
aggregation, you
are guaranteed
to be in charge
at all times."**

For years, DJURA's track & trace technology has been employed successfully in pharmaceutical and tobacco industries, where authenticity and traceability are of the utmost concern. Our reliable track and trace system functions as a fully-closed circuit, that enables you to create a validated serialisation, aggregation and production process. And thanks to intelligent analysis of production data and user feedback, DJURA gets smarter by the day.
